Hello,

I am writing to voice my opposition to the Proposed Final Judgment for the Microsoft antitrust case. I feel that the PFJ does little to encourage competition, in some parts, even further hurts competition, lacks any true enforcement mechanisms, and does not in any way punish Microsoft for its already established anti-competitive practices.

If true competition in the computer industry is to ever return, a new punishment and enforcement plan must be determined.

Sincerely,  
Pete Toscano  
Fairfax, VA
